Experience

Makerspace Assistant – EXLAB *February 2026- Present*

Georgia State University — Atlanta, GA

- Support daily operations of the EXLAB makerspace, assisting students, faculty, and staff with fabrication tools and prototyping equipment.
- Teach workshops and provide guidance on maker technologies including 3D printing, laser cutting, fabrication tools, and electronics prototyping.
- Manage workstation scheduling, equipment check-out systems, and ensure safe usage of tools and machinery.
- Mentor users on best practices for hands-on project development and rapid prototyping workflows.
- Represent the EXLAB at outreach events and provide tours demonstrating makerspace capabilities.

Adjunct Instructor – Software Development *February 2025 – August 2025*

Southewest Technical College, Cedar City, Utah

- Taught courses in web development, JavaScript, and full-stack application development to students in the Software Development program.
- Delivered lectures and hands-on labs covering front-end technologies and back-end programming concepts.
- Guided students through software development lifecycle practices, debugging techniques, and project-based learning assignments.

Software Engineer

Integrated Process Systems (IPS), Cedar City, UT *May 2024 – December 2024*

- Automated PLC tag retrieval with AutoHotkey, reducing retrieval time by 51.4% (from 16:53 to 8:12 for 120 tags).
- Configured network systems and designed and implemented SQL tables to manage machine states and alarms.
- Automated device control logic to streamline operations and improve efficiency.
- Developed a C# UI with Windows Forms and .NET 8 for a Northrop Grumman wastewater treatment system.
- Delivered high-quality software solutions within project deadlines while collaborating with senior SWE and Electrical/Mechanical Engineering teams.

Virtual Reality / Augmented Reality Software Developer Intern

Southern Utah University, Cedar City, UT *September 2023 – April 2024*

- Developed a VR educational app for Meta Quest using C# and Unity, providing 100+ apprentice teachers with virtual classroom experiences within 6 months of learning Unity.
- Reduced off-campus training by 40%.
- Provided hardware and software support for VR labs, benefiting over 150 students.
- Participated in VR Club meetings and VR labs, fostering learning and collaboration with students and faculty.

Object Oriented Programming Teacher Assistant / Grader

Southern Utah University, Cedar City, UT *September 2023 – April 2024*

- Assisted in teaching and mentoring over 50 students in Object-Oriented Programming labs.
- Graded assignments/exams and provided debugging support for Java and Python projects.
- Strengthened mentoring, collaboration, and programming skills while working closely with faculty and students.

HR Data Integrity Assistant

Southern Utah University, Cedar City, UT *May 2023 – July 2023*

- Maintained accurate and compliant HR data across multiple systems.
- Performed data cleaning, validation, and report generation to support HR operations.
- Utilized Microsoft SQL Server, SQL, and Excel to ensure data accuracy and integrity.

Projects

City of Hope Family Ministries App

- Built a cross-platform ecosystem for a real church organization, including a React Native mobile app (iOS/Android), a public Next.js website, and a web-based admin dashboard.
- Implemented authentication, real-time database integration, and cloud file storage using Supabase, with Row Level Security policies to protect sensitive data.
- Developed an admin dashboard enabling non-technical church staff to manage events, sermons, announcements, and gallery images without writing code.

Mobile Wash & Drop

- Designed and developed a website for a mobile laundry pickup and delivery service currently serving around 200 clients in the Atlanta Metropolitan Area, enabling users to view services, pricing, submit booking requests, and payment processing.
- Integrated form handling and client-side validation to improve user experience and reduce incorrect submissions.

Shieldora

- Built a full-stack web application focused on intelligent email security features.

- Implemented backend logic for user management, authentication flows, and role-based access control.
- Developed a clean, responsive frontend interface and ensured secure data handling between client and server.

Technical Skills

Programming Languages: Java, C#, Python, SQL, JavaScript, Arduino
Tools & Technologies: AWS, Git, REST APIs, CI/CD, Supabase, Vercel, Linux
Frameworks & Libraries: Spring Boot, React.js, Node.js, Next.js, .NET, Pandas, Scikit-learn
Additional Skills: CI/CD Pipelines, Test case writing, MVC Design Patterns, Microsoft 365 Suite, Google Workspace, SQL Server

Education

Master of Science in Computer Science (2025- 2026)
Georgia State University (GSU), Atlanta, GA
Bachelor of Science in Computer Science (2021-2024)
Southern Utah University (SUU), Cedar City, UT

Languages

English, French, Spanish, Swahili

Extracurricular Activities and Certifications

VR Club, Game Development Club, Computer Science Club

Awards

International Founder's Scholarship at SUU, National Society of Leadership and Success (NSLS), Dean's List Spring 2024 at SUU.
